Mohammad Zaki Jariwala

Technology Strategy · Cloud & AI Architecture

Navi Mumbai, India | +91 9601406034 | jariwalazaki@gmail.com | linkedin.com/in/zakijariwala | zakijariwala.space

PROFESSIONAL SUMMARY

Technology strategy and cloud architecture professional with three years on Tata Consultancy Services' client engagement at State Bank of India. Kept Tier-1 banking platforms at 99.9% availability for 30,000+ users, led a team of five, and shaped the IT strategy and technology roadmap for infrastructure modernisation within RBI and SEBI rules. Hands-on in GenAI and LLM solutioning: identifying and prioritising AI use cases, assessing emerging technology, and building custom AI agents with Claude, including an outreach agent with 90%+ inbox delivery and a pipeline that cut drafting time by 85%. Claude Certified Architect – Professional, Google Cloud Professional Cloud Architect and AWS Solutions Architect. Skilled at turning technical risk into clear recommendations for business stakeholders and senior leadership.

SKILLS

- **Strategy & consulting:** IT and technology strategy, AI strategy, digital and AI maturity assessments, IT and AI roadmaps, AI use case identification and prioritisation, AI operating models, emerging technology assessment, build-vs-buy evaluation, stakeholder management, regulatory compliance (RBI/SEBI)
- **Cloud & enterprise architecture:** Google Cloud, AWS, Oracle Cloud, Cloudflare, enterprise architecture, high-availability and disaster recovery design, identity and access management, Docker, Podman, CI/CD (GitHub Actions), Linux (RHEL/Ubuntu)
- **GenAI & AI solutioning:** GenAI, LLMs, custom AI agents (Claude, Microsoft Copilot), Anthropic Claude API, Claude Code, Google Gemini, prompt design, LLM output evaluation, Python automation
- **Tools & analytics:** Microsoft PowerPoint, Microsoft Excel, PostHog funnel analytics, SQLite, Supabase/PostGIS

PROFESSIONAL EXPERIENCE

Systems Engineer, IDM & Infrastructure | Tata Consultancy Services, client: State Bank of India (SBI GITC) 2023 – Present

- Led a team of 5 engineers on a client engagement, keeping Tier-1 banking applications at 99.9% availability for 30,000+ branch users, setting priorities, mentoring engineers and owning escalations end to end.
- Shaped the IT strategy for infrastructure modernisation: ran an emerging technology assessment (Podman vs Docker) and a build-vs-buy evaluation against RBI/SEBI rules, won security and compliance sign-off, and turned the result into a prioritised technology roadmap for leadership.
- Cut recovery time (RTO) by 50%, from about 4 hours to under 2, by designing disaster recovery runbooks with the application and database teams and proving them in tabletop drills and live runs.
- Managed stakeholders across 4 teams (infrastructure, application, database, security), aligning delivery priorities and turning incident data and technical risk into recommendations for senior leadership.
- Operated enterprise identity architecture (IBM Security Identity Manager) across 150+ application servers, and saved the team about 8 hours a week by automating patch compliance, certificate tracking and capacity reports in Python and Bash.

Technology & Product Lead (unpaid) | Zamaan Marine, family marine-equipment business 2025 – Present

- Ran a digital maturity assessment of the business through interviews with 200+ B2B prospects, testing channels, value proposition and pricing before anything was built.
- Identified and prioritised AI and automation use cases, then set a zero-budget digital and AI roadmap (storefront, eBay API automation, AI-driven outreach) that cut time per listing by about 60%.
- Designed and shipped a custom AI agent for B2B outreach (Claude API, Python, Brevo) with per-industry prompt templates, reaching 90%+ inbox delivery across campaign cycles.
- Tracked the funnel from storefront visit to eBay conversion in PostHog, and ran a sister SEO site as a formal experiment with a 90-day success threshold (50+ attributed clicks a month) and shutdown criteria set in advance.

Founder & Technical Communication Coach | Independent coaching practice 2025 – 2026

- Built a coaching practice from zero to 50+ engineering and management clients, running acquisition, curriculum design and delivery.
- Designed a curriculum and repeatable frameworks on stakeholder communication, STAR framing and explaining complex work to non-technical decision-makers, revising it based on client outcomes.

PROJECTS

LLM Content Automation Pipeline 2025 – Present

- Cut research-to-draft time by 85% with a pipeline that turns a video transcript into a long-form article plus 5 social-platform versions in under 3 minutes.
- Built a quality gate that catches generic, hedging LLM output and forces rewrites until it passes specificity checks, plus 12 domain-specific prompt frameworks that adapt tone without changing the core pipeline.

Website Assessment & Rebuild for an IT Hardware Reseller (GidsTek) 2026

- Assessed the client's WordPress site (14.54s load, layout shift 1.0, B-grade SSL, 5 missing security headers) and used the findings to make the case for a rebuild.
- Scoped and delivered the rebuild: load under 1s, layout shift 0, all 5 security headers added, legacy URLs redirected.

CERTIFICATIONS & EDUCATION

- Claude Certified Architect – Professional (Anthropic, 2026) | Professional Cloud Architect (Google Cloud, 2026)
- AWS Certified Solutions Architect – Associate (AWS, 2026) | Generative AI Leader (Google Cloud, 2026)
- B.Tech, Electronics & Communication Engineering | Dharmsinh Desai University, 2023
